

▶ The first in a series of books launched by the Association for Computing Machinery (ACM) to honor and celebrate the achievements of the ACM A.M. Turing Award recipients.

## Making Databases Work

### *The Pragmatic Wisdom of Michael Stonebraker*

Edited by Michael L. Brodie, *Massachusetts Institute of Technology*

Paperback ISBN: 9781947487161 • eBook ISBN: 9781947487178  
Hardcover ISBN: 9781947487192 • December, 2018 • 730 pages  
Paperback: \$99.95 • eBook • eBook: \$79.96 • Combo: \$119.94  
Hardcover: \$119.95 • Hardcover Combo: \$143.94

This book celebrates Michael Stonebraker's accomplishments that led to his 2014 ACM A.M. Turing Award "for fundamental contributions to the concepts and practices underlying modern database systems."

The book describes, for the broad computing community, the unique nature, significance, and impact of Mike's achievements in advancing modern database systems over more than forty years. Today, data is

considered the world's most valuable resource, whether it is in the tens of millions of databases used to manage the world's businesses and governments, in the billions of databases in our smartphones and watches, or residing elsewhere, as yet unmanaged, awaiting the elusive next generation of database systems. Every one of the millions or billions of databases includes features that are celebrated by the 2014 Turing Award and are described in this book.

Why should I care about databases? What is a database? What is data management? What is a database management system (DBMS)? These are just some of the questions that this book answers, in describing the development of data management through the achievements of Mike Stonebraker and his over 200 collaborators. In reading the stories in this book, you will discover core data management concepts that were developed over the two greatest eras—so far—of data management technology.

The book is a collection of 36 stories written by Mike and 38 of his collaborators: 23 world-leading database researchers, 11 world-class systems engineers, and 4 business partners. If you are an aspiring researcher, engineer, or entrepreneur you might read these stories to find these turning points as practice to tilt at your own computer-science windmills, to spur yourself to your next step of innovation and achievement.

# TABLE OF CONTENTS

Data Management Technology Kairometer: A Historical Index: *M. Brodie*

Preface: *M. Brodie*

Introduction: *M. Brodie*

## Part I: 2014 ACM A.M. Turing Award Paper and Lecture

The Land Sharks are on the Squawk Box: *M. Stonebraker*

## Part II: Mike Stonebraker's Career

Chapter 1. Make it Happen: The Life of Michael Stonebraker

Mike Stonebraker's Student Genealogy

The Career of Mike Stonebraker: The Chart: *A. Pavlo*

## Part III: Mike Stonebraker Speaks Out, An Interview with Marianne Winslett

Chapter 2. Mike Stonebraker Speaks Out: An Interview: *Marianne Winslett*

## Part IV: The Big Picture

Chapter 3: Leadership and Advocacy: *P. Bernstein*

Chapter 4: Perspectives: The 2014 ACM Turing Award: *J. Hamilton*

Chapter 5: Birth of An Industry, Path to The Turing Award: *J. Held*

Chapter 6: A Perspective of Mike from A 50 Year Vantage Point: *D. Dewitt*

## Part V: Startups

Chapter 7: How to Start A Company in Five (Not So Easy) Steps: *M. Stonebraker*

Chapter 8: How to Create & Run A Stonebraker Startup—The Real Story: *A. Palmer*

Chapter 9: Getting Grownups in The Room: A VC Perspective: *J. Tango*

## Part VI: Database Systems Research

Chapter 10: Where Do Good Ideas Come from And How to Exploit Them: *M. Stonebraker*

Chapter 11: Where We Have Failed: *M. Stonebraker*

Chapter 12: Stonebraker And Open Source: *M. Olson*

Chapter 13: The Relational Database Management Systems Genealogy: *F. Naumann*

## Part VII: Contributions by System

Chapter 14: Research Contributions of Mike Stonebraker: An Overview: *S. Madden*

## Part VII.A: Research Contributions by System

Chapter 15: The Ingres Years: *M. Carey*

Chapter 16: Looking Back at Postgres: *J. Hellerstein*

Chapter 17: Databases Meet the Stream Processing Era: *M. Balazinska, S. Zdonik*

Chapter 18: C-Store: Through the Eyes of a Ph.D. Student: *D. Abadi*

Chapter 19: In-Memory, Horizontal, And Transactional: The H-Store OLTP DBMS Project: *A. Pavlo*

Chapter 20: Scaling Mountains: SciDB And Scientific Data Management: *P. Brown*

Chapter 21: Data Unification at Scale: Data Tamer: *I. Ilyas*

Chapter 22: The BigDAWG Polystore System: *T. Mattson, J. Rogers, A. Elmore*

Chapter 23: Data Civilizer: End-to-End Support for Data Discovery, Integration, And Cleaning: *M. Ouzzani, N. Tang, R. Castro Fernandez*

## Part VII.B: Contributions from Building Systems

Chapter 24: The Commercial Ingres Codeline: *P. Butterworth, F. Carter*

Chapter 25: The Postgres And Illustra Codelines: *W. Hong*

Chapter 26: The Aurora/Borealis/StreamBase Codelines: A Tale of Three Systems: *N. Tatbul*

Chapter 27: The Vertica Codeline: *S. Løvrande*

Chapter 28: The VoltDB Codeline: *J. Hugg*

Chapter 29: The SciDB Codeline: Crossing the Chasm: *K. S. Sharma, A. Poliakov, J. Kinchen*

Chapter 30: The Tamer Codeline: *N. Bates-Haus*

Chapter 31: The BigDAWG Codeline: *V. Gadepally*

## Part VIII: Perspectives

Chapter 32: IBM Relational Database Code Bases: *J. Hamilton*

Chapter 33: Aurum: A Story About Research Taste: *R. Castro Fernandez*

Chapter 34: Nice: Or What It Was Like to Be Mike's Student: *M. Hearst*

Chapter 35: Competitor, Collaborator, Friend: *D. Haderle*

Chapter 36: The Changing of The Database Guard: *M. Brodie*

## Part IX: Seminal Works of Michael Stonebraker and his Collaborators

OLTP Through the Looking Glass, And What We Found There: *S. Harizopoulos, D. J. Abadi, S. Madden, and M. Stonebraker*

"One Size Fits All": An Idea Whose Time Has Come and Gone: *M. Stonebraker and U. Çetintemel*

The End of An Architectural Era (It's Time for A Complete Rewrite): *M. Stonebraker, S. Madden, D. J. Abadi, S. Harizopoulos, N. Hachem, and P. Helland*

C-store: A Column-Oriented DBMS: *M. Stonebraker, et al.*

The Implementation of Postgres: *M. Stonebraker, L. A. Rowe, and M. Hirobama*

The Design and Implementation of Ingres: *M. Stonebraker, E. Wong, P. Kreps, and G. Held*
